

25-year warranty for photovoltaic brackets

Overview

Two Warranty Types Protect Different Areas: Product warranties (10-25 years) cover equipment defects and failures, while performance warranties (25 years) guarantee minimum power output of 90% at 10 years and 80-85% at 25 years. Natural Disasters and Improper Installation Void Coverage: A standard solar panel warranty should come with at least 10 years of protection, though many premium options now offer 25 or even 30+ years of coverage. During the warranty period, PV manufacturers guarantee that the degradation of PV modules will not exceed 0. When you're spending \$15,000 to \$30,000 on a solar energy system, the warranties that protect this investment become your safety net against unexpected costs and equipment failures.
