

A five-person team installs photovoltaic panels

Overview

A Solar Energy Technician installs, maintains, and repairs solar panel systems. Their duties include assessing installation sites, connecting solar panels to the power grid, performing maintenance checks, and troubleshooting system problems to ensure efficient operation and maximal. In order to develop a well-trained, equitable, and inclusive workforce with high-quality jobs, DOE's Solar Energy Technologies Office (SETO) solicited input from a variety of stakeholders on employment-related needs, strategies, and challenges for the solar industry. Most solar panel installations are done outdoors, but PV installers sometimes work in attics and crawl spaces to connect panels to the electrical grid. Installers also must. A Solar Installer, or PV Installer, is responsible for planning and installing photovoltaic systems that deliver solar power to homes and businesses. Their duties include configuring the solar panels for the specific situation, preparing and assembling the parts for the solar panels and installing. Also known as a solar panel installer, a solar PV installer is a skilled tradesperson who installs solar panels and support structures on residential, commercial, community and utility-scale projects.
