

Armenia solar installation

Overview

Armenia added approximately 615 MW of solar capacity in 2025, achieving a record year for solar deployment and bringing its cumulative total to 1.1 GW, according to pv magazine. 1 GW, the country's Minister for Territorial Administration and Infrastructure, Davit Khudatyan, has said. The total indicates around 615 MW of solar were added in 2025, when considering the International Renewable Energy Agency (IRENA) reported. In 2019, the European Union announced plans to assist Armenia towards developing its solar power capacity. The announcement, first reported by the ARKA news agency, marks a significant milestone for the nation's clean. Recent reports indicate a significant move by the Armenian government to bolster its renewable energy sector: a proposed \$50 million subsidy program aimed at encouraging the installation of rooftop solar panels for households and businesses. While this development signals a major commitment to. If in 2021 the share of solar energy in the total volume of electricity production in Armenia was 1.2%, then in 2024 it will be ten times more - 11.
