

# Brasilia Power Grid Company s requirements for energy storage

## Overview

---

The regulatory framework introduces clear authorization processes under the Independent Power Producer regime and establishes rules for grid access contracts and tariff structures that prevent double charging, though direct subsidies are not provided. Brazil's National Electric Energy Agency (ANEEL) has released a comprehensive technical note following Public Consultation No. 39/2023, focusing on refining the regulatory framework for Energy Storage Systems (ESS) within the Brazilian electricity sector. The regulation defines ESS broadly to regulators, investors, and other stakeholders. More than a diagnosis, it offers a roadmap of opportunities and recommendations to accelerate the integration of storage technologies, strengthening reliability, reducing costs, and addressing the challenges for the Brazilian power sector. Brazil published Law 15. The Smart Grid Forum 2025 showed that intermittent renewable sources — solar, wind, and distributed microgeneration — should represent about 42% of Brazil's installed electric generation capacity by 2034.

## Brasilia Power Grid Company s requirements for energy storage

### The Utility-Scale Landscape for Energy Storage in Brazil

According to PDE 20341, the need for additional supply to meet the power requirement begins in 2027, reaching the order of 5.5 GW in 2028 and reaching more than 36 GW in 2034. PDE 2034 - ...

### Advancing Energy Storage Regulation in Brazil

This initiative forms part of ANEEL's 2025-2026 Regulatory Agenda, which seeks to modernize Brazil's energy framework by incorporating energy storage systems (SAE), including ...

### ACCELERATING THE BRAZILIAN ENERGY TRANSITION

This report seeks to answer a central question: what role can energy storage systems play in the Brazilian power sector, and what technical, economic, and regulatory conditions are necessary for ...

### Brazil adopts legal framework for battery storage

Brazil published Law 15.296 on November 25, establishing a series of changes to laws in its electricity sector including guidelines for the regulation of storage systems, tax exemptions and ...

(500kw/1mw)  
AIR COOLING  
ENERGY STORAGE CONTAINER

## Brazil Energy Storage Regulatory Framework

The document highlights challenges such as the high upfront cost of storage technologies and prioritizes policies to integrate storage with renewables, aiming to reduce ...

## **Brazil's First Energy Storage Regulatory Framework to Be Introduced**

At a public hearing held by the Chamber of Deputies' Mines and Energy Committee, Daniel Danna, Director of the National Electric Energy Agency (ANEEL), stated that the regulatory authority ...

## **Brazil Energy Storage Market 2026: Trends, Policies, and How to Buy**

A complete 2026 guide to Brazil's commercial & industrial energy storage market. Learn policies, PDE 2034 trends, ANEEL regulations, 100-241 kWh system selection, 2 MW parallel ...

## Brazil: Law No. 15,269/2025 published -- Reform of the electric sector

Law No. 15,269/2025 establishes, for the first time, a legal framework for energy storage, setting out guidelines for regulating an activity that previously lacked clear rules.

## Energy storage regulation in Brazil

The regulation of energy storage in Brazil ultimately represents an institutional test of the Brazilian regulatory model. It's not just about incorporating a new technology, but about updating the ...

## Challenges of Transition and Modernization of the Brazilian Power Grid

Energy planning (such as the Decennial Plan, PDE) must explicitly incorporate emerging demands (such as data centers, distributed generation, electric vehicles) and the network ...
