

China solar power to battery in kenya

Overview

On May 21, 2025, China reaffirmed its dominance in Kenya's energy sector, supplying 96% of solar panels and 81% of lithium batteries. Known as the Garissa Solar Power Plant, the 55 megawatts (MW) facility is the "largest grid-connected solar power plant in east and central Africa", according to Kenya's Rural Electrification and Renewable Energy Corporation (REREC). The plant was designed and built by China Jiangxi Corporation for International Economic and Technical Cooperation. This photovoltaic power plant project in Kenya will be located in the Garissa County, with a preferential loan of 13 billion. But here's the kicker: Last December, the country experienced 18 grid collapses despite having 890 MW of installed solar capacity [1]. Battery storage isn't just a nice-to-have here—it's.
