

Cost of rack-connected network configuration for islands in Philippines

Overview

Philippine businesses need resilient network infrastructure to avoid downtime and deliver client-ready performance. This blueprint covers topology design, hardware essentials, monitoring, security, and disaster recovery—all tailored for industries and BPO hubs. This setup involves several components, such as entrance facilities, an equipment room, cabling types, and telecommunications rooms, which are linked together to enable connectivity in a building. The result: faster, more reliable. We offer supply and installation, design, plotting & implementation of structured cabling for copper cables, fiber optic, cables, coaxial cables, Cat 5E, Cat 6, Cat 6E, and fiber cables. (2016 revised IRR, Section 5[c]) BIR - Bureau of Internal Revenue. Structured Network Cabling Solutions for businesses that support a low-voltage infrastructure.
