

# Cracks under photovoltaic glass panels

## Overview

---

A crack in your solar panel glass doesn't mean your investment is lost. When damage from hail, debris, or thermal stress occurs, you must choose between repair and replacement. While not a common problem, it's one that may arise over time due to various factors such as thermal cycling, weather conditions, or improper handling. This article will guide you through the process of repairing cracked. Solar modules are getting bigger, thinner, and more powerful. Not from hail or mishandling, but from cracks that spider from frame edges, splinter near clamps, and web across modules.
