

Cylindrical large monomer 30A lithium iron phosphate battery

Overview

The BLF-1230A is the entry level unit of Bioenno Power's high-power 12V battery line designed for more stationary applications and higher power consumption portable electronics requiring a higher capacity and greater power output battery while demanding a battery which can reliably. The BLF-1230A is the entry level unit of Bioenno Power's high-power 12V battery line designed for more stationary applications and higher power consumption portable electronics requiring a higher capacity and greater power output battery while demanding a battery which can reliably. The Lithium-Ion PowerBrick+ battery 12V-30Ah offers high level of safety through the use of cylindrical cells in Lithium Ferro Phosphate technology (LiFePO₄ or LFP). PowerBrick+ 12V-30Ah integrates an innovative Battery Management System (BMS) in its casing to ensure a very high level of safety in. The most versatile battery of the 12V lineup with a large capacity. More than 8 times higher than lead-acid batteries (generally only 300-400 cycles can be charged). The battery adopts the process of welding all tabs on the end face. Multiple Shapes with 14500, 18650, 26650, and 32600. Wide Discharge rate range from 1C to 15C.

Cylindrical large monomer 30A lithium iron phosphate battery

Cylindrical battery cell

Compared with prismatic batteries, the production speed of cylindrical batteries is much faster, so each battery can produce more kWh per day, which is equivalent to lower cost per kWh.

LFP Cylindrical cell

Cylindrical lithium iron phosphate batteries can effectively reduce the assembly cost of batteries. The battery adopts the process of welding all tabs on the end face.
