

# Desert Solar Generator

## Overview

---

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada. It was slated to close in 2026, but that decision has been reversed by the California Public Utilities Commission. The facility derives its name from its proximity to Ivanpah, California, which lies within the Mojave National Preserve. Construction began October 27, 2010. The Ivanpah system consists of three towers on 3,500 acres (1,400 ha) of near the California-Nevada border in the Mojave Desert. Initially it was planned with 440 MW gross on 4,000 acres (1,600 ha). The plant burns each morning to commence operation. BrightSource reported, "Instead of ramping up the plant each day before sunrise by burning one hour's worth of natural gas to generate steam, Ivanpah needs more time to ramp up. BrightSource estimated that the Ivanpah facility would provide 1,000 jobs at the peak of construction, 86 permanent jobs, and total economic benefits of \$3 billion. Elected Supervisor Brad Mitzelfelt, who represents the area, said the plant would provide 640 GWh/year from Units 1 and 3 and 336 GWh from Unit 2 was met by 2017, following sharply reduced production in the first few years of operation, particularly in the start-up year of 2014.

## Desert Solar Generator

### [Ivanpah Solar Electric Generating System](#)

The Ivanpah Solar Electric Generating System is a 386-megawatt project consisting of three solar concentrating thermal power plants located in the Mojave Desert in San Bernardino County. The project was certified by ...

### [Portable Generators with Solar Panels](#)

Our portable solar-powered generators & solar panels deliver reliable off-grid power. No fuel & no fumes. Perfect for outdoor adventures & emergencies!

### [Solar Generator for Off-Grid Living , Trent and Whitney](#)

Explore how Trent and Whitney power their off-grid yurt in the Mojave Desert using Renogy's solar solutions, saving money and reducing emissions while living sustainably.

### [Ivanpah Solar Electric Generating System](#)

Located in the Mojave Desert of Southern California, the 377-megawatt Ivanpah Solar Electric Generating System is the world's largest solar thermal facility.

## Amazon : Solar Generator

Elevate your outdoor adventures or power your home during emergencies with a reliable solar generator. Explore top-rated models from trusted brands.

## [Rugged Solar Generators: The Complete Buying Guide](#)

When it comes to reliable off-grid power, not all solar generators are built the same. Rugged solar generators are designed to withstand demanding environments--whether you're camping in the desert, ...

## About

We are dedicated to providing exceptional customer service, offering solar power systems, generators, and home battery installations for residential and commercial clients.

## Desert Prep Parts Lists

Everything you need to build your own high-capacity off-grid solar generator. Complete plans including design worksheet, parts list, schematic. Free for all uses.

## The Ivanpah Solar Project is an Engineering Solar Power Giant in the

In the heart of the Mojave Desert, a glittering sea of mirrors sprawls across 3,500 acres, harnessing the relentless desert sun to power homes and businesses across California.

### Ivanpah Solar Power Facility

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada.
