

# Differences between photovoltaic combiner box and combiner box

 LFP 48V 100Ah

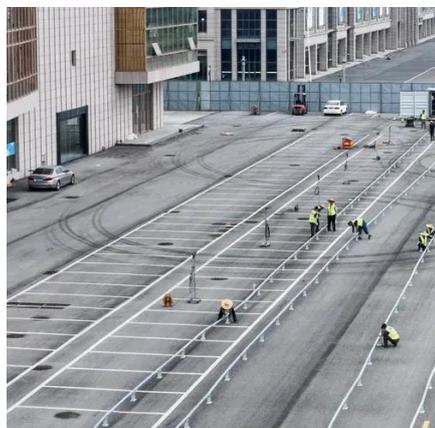

## Overview

---

While a regular combiner box is a simple and cost-effective solution for small-scale PV systems, a box PV combiner AC offers more advanced features and higher efficiency, making it a better choice for large-scale PV projects. Combiner boxes combine the DC or AC outputs of several solar panels or inverters into one output line, which is then fed into an inverter or the grid. In a PV array, individual panels generate relatively low-voltage DC power. You might wonder what a combiner box does in.
