

Dominica demand response

Overview

In a growing concern for residents and officials alike, Dominica is facing a mounting energy crisis. The island nation's aging power plants, once the backbone of its electricity supply, are now grappling to keep pace with the surging demand for energy. The 2025 Article IV Consultation highlights that Dominica's economic outlook is positive, predicated on the implementation of the country's economic modernization and development agenda, but risks weigh on the downside. Real gross domestic product (GDP) grew by 3.5 percent in 2024, supported by a. Dominica's energy sector is modernizing, and the demand response management system market is growing. Hunter believes the situation could be better managed if CARICOM member states collaborate, rather than. A multi-faceted approach to reducing peak demand Accurately predicting load and reducing peak demand is top-of-mind for electric utility planners. And in the age of electrification, this is only going to become more important as customers' reliance on electricity increases.
