

Electric vehicle infrastructure lisbon

Overview

Portugal's government has announced a new set of measures to enhance urban mobility, including expanded public transport access, new incentives for electric vehicles, and investments in sustainable infrastructure. Decarbonizing the automotive sector is thus a necessary and ongoing revolution, with electric mobility playing a crucial role in reducing emissions both nationally and globally. The electric vehicle (EV) market is growing rapidly in Portugal. New business models have emerged, and mobility behaviors. Lisbon, one of five new cities in this edition of the Urban Mobility Readiness Index, boasts strong adoption of electric vehicles (EVs). Siemens transforms Lisbon's Infinity Building with 200 VersiCharge EV chargers, showcasing smart infrastructure and sustainable urban mobility solutions.
