

Electric vehicle safety cyprus

Overview

Modified electric bicycles that exceed legal speed and power limits are increasingly detected on public roads, raising safety concerns and prompting intensified police checks, as authorities warn that many of the vehicles do not comply with existing legislation. Safety Risks From Modified Electric. Cyprus aims to reduce conventional vehicle use from 97 per cent to 70 per cent by 2030, under its National Energy and Climate Plan (NECP), requiring the registration of 85,000 electric vehicles. However, with just 2,270 electric vehicles sold last year—largely due to a state subsidy programme—the market for zero-emissions passenger cars on the island is 'still at an early stage in its development,' the EU says., President of the Cyprus E-Mobility Association. The numbers back him up: in 2024, the EV market share in Cyprus nearly doubled from 2.7% to 4%, a. Cyprus is preparing to launch a new phase of its electric mobility subsidy programme, expected to be announced before the end of 2025. The initiative, financed with €4.
