

Electric vehicle safety north korea

Overview

17, automakers are required to obtain government certification of the safety of batteries used in their electric vehicles. The National Fire Agency reported 49 battery-related fires. Recent fire incidents following electric vehicle (EV) collisions have been increasing rapidly in Korea, corresponding to the growing distribution of EVs. While the overall number of EV fires is lower compared to those involving internal combustion engine (ICE) vehicles, EV fires can lead to more. What it does: Allows government to manage and track EV batteries to bolster safety Took effect: Feb. These measures, announced under the Prime Minister's leadership, were developed in response to recent EV fire incidents.
