

# Energy storage regulations costa rica

## Overview

---

The 2021 Distributed Energy Law (Law 10086) provides a strong legal framework for self-generation, grid interconnection, and net billing, positioning the country as a regional leader in consumer-based renewable energy. ICLG - Renewable Energy Laws and Regulations - Costa Rica Chapter covers common issues in renewable energy laws and regulations – including the renewable energy market, sale of renewable energy and financial incentives, consents and permits, and storage. It provides benefits like net metering and tax breaks to promote green technology. International. Here's an overview of Energy Law in Costa Rica: 1. The sector is largely state-controlled with strong environmental oversight. The country's National Decarbonisation Plan 2018–2050 and Electricity Sector Expansion Plan set ambitious targets. Sandboxes, energy communities, distributed energy resources (DER), and renewable auctions were identified as key aspects for the energy transition under the pillars of decarbonization, digitalization, and decentralization (including community self-governance).
