

# Energy storage system prices hit bottom

## Overview

---

In 2025, the global average price of a turnkey battery energy storage system (BESS) is US\$117/kWh, according to the Energy Storage Systems Cost Survey 2025 from BloombergNEF (BNEF), published last week (10 December). That was a 31% decline from 2024 numbers. BNEF says the decline is driven by continued. According to EnergySage's new Solar & Storage Marketplace Report, prices for both home solar and solar + storage reached record lows in the second half of 2024. Recently, the latest news released by the Zhongguancun Energy Storage Industry Technology Alliance (CNESA) revealed that the State Power Investment Group's wind, solar, and storage-integrated project in Tieleketi. At the beginning of 2025, the grid-type energy storage system still maintained a technical premium of 0.558 yuan/Wh, 12%-18% higher than the ordinary system, but now the average price of 0.42 yuan/Wh in Xinjiang's bidding has completely wiped out the premium space. This price is even. With energy storage battery prices dropping like hot potatoes in 2024 (we're talking 30-55% reductions from 2023 levels), even Santa's elves would struggle to keep up with this price-cutting frenzy.

## Energy storage system prices hit bottom

### Energy Storage Battery Prices Hit Bottom and Rebounded! The Era of

In 2024, the overall supply of energy storage battery capacity will exceed demand, the price of battery cells will plummet by 60% to 0.3 yuan/Wh, and the average system price will be halved to 0.5-0.6 ...

### Why Energy Storage Battery Prices Are Falling Faster Than You Think

Let's face it - the energy storage industry is having its own version of a year-round clearance sale. With energy storage battery prices dropping like hot potatoes in 2024 (we're talking ...

### Energy Storage System Price Trends and Cost-Saving Solutions in 2024

Over the past 3 years, the average energy storage system price has dropped by 28% worldwide. What's driving this downward trend? Technological breakthroughs in lithium-ion batteries, ...

### Home Solar and Battery Storage Prices Hit Record Lows -> Energy

The cost of installing residential solar and integrated battery storage systems in the United States has reached an all-time low, signaling a critical affordability milestone for the energy ...

## Energy Storage System Prices Hit Bottom, Officially Entering

According to the CNESA Global Energy Storage Database in April, the average bid price of energy storage systems has dropped to 0.627 yuan/Wh, a significant decline both month-on ...

## [Energy Storage Systems Cost Survey 2025 , BloombergNEF](#)

Turnkey energy storage system prices fell sharply this year to a global average of \$117/kWh, down 31% from 2024. This marks the lowest level in BloombergNEF's annual cost survey, driven by continued ...

## [Battery storage system prices continue to fall](#)

BNEF found that, due in part to a widespread shift to lower-cost lithium iron phosphate (LFP) battery cells, stationary energy storage pack prices were the lowest of any market segment in ...

## [Home solar prices just hit record lows -](#)

## and storage is ...

Home solar and battery storage prices hit record lows in 2024 as high-output panels take over - here's what's driving the shift.

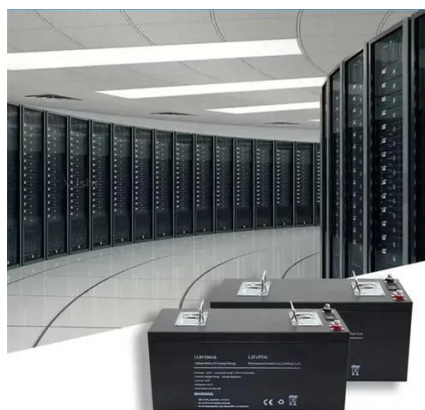

## How Falling BESS Prices Offset Impact of Tariffs

It means that the cost of installing a battery storage system is still very affordable, even with tariffs in place. While U.S. manufacturers are increasing production and aiming to offer more ...

## **Global energy storage system prices hit record low as costs fall 31%**

Energy storage system prices have fallen to their lowest level on record, dropping to a global average of \$117/kWh in 2025. The new figures come from BloombergNEF's Energy Storage ...
