

Eu energy storage projects 2025

51.2V 150AH, 7.68KWH

Overview

In 2025, European Union member states installed 27.1 GWh of new battery energy storage capacity—a 45% increase over 2024—marking the twelfth consecutive year of record-breaking growth, according to the EU Battery Storage Market Review 2025 published by SolarPower Europe. The EU's battery energy storage market is projected to reach 100 GWh by 2030. Explore 2025 BESS projects across Europe, from Germany's Na-ion advancements to France and Spain's renewable energy storage initiatives. AI-generated illustration by Battery Technology. 1 GWh of battery storage in 2025—up 45% year-on-year—with utility-scale deployments (15 GWh) surpassing residential (9. Discover how the EU's policies and regulations drive energy storage innovation, ensuring a clean, secure, and resilient energy future.

Eu energy storage projects 2025

EU installs record 27 GWh of battery storage capacity in 2025

The EU installed a record 27.1 GWh of new battery storage capacity in 2025, driven by utility-scale projects that accounted for over half of new additions as the bloc races to build the ...

2025 BESS Projects Transforming Energy Storage Across Europe

Explore 2025 BESS projects across Europe, from Germany's Na-ion advancements to France and Spain's renewable energy storage initiatives.

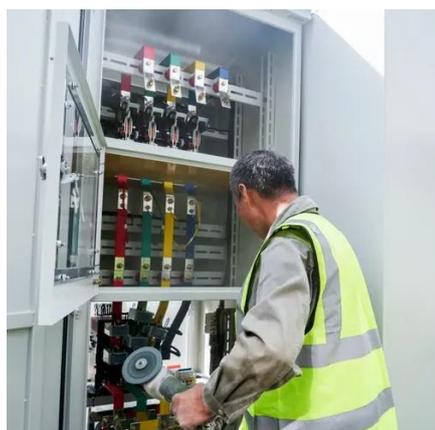

EU installs 27.1 GWh of battery storage in 2025 as utility-scale

The EU Battery Storage Market Review 2025 identifies three priority areas for EU action to effectively scale battery storage. Accelerate deployment of BESS: To speed up the rollout of ...

New report: EU installs 27.1 GWh of new batteries in 2025 as utility

27.1 GWh of new battery capacity installed in 2025, marking the EU's 12th consecutive record year for battery storage deployment. 55% of all new capacity came from utility-scale systems, ...

EU battery storage installations jump 45% in 2025 as utility-scale

The European Union installed 27 gigawatt hours (GWh) of new battery storage capacity in 2025, a 45% increase from the previous year and the market's 12th consecutive annual record, ...

[EU Battery Storage Capacity Soars 45% to 27.1 GWh in 2025](#)

In 2025, European Union member states installed 27.1 GWh of new battery energy storage capacity--a 45% increase over 2024--marking the twelfth consecutive year of record ...

[2025 concludes with 1.5GWh+ of European BESS project news](#)

The projects combined total well over 1.5GWh grid-scale battery energy storage system (BESS) capacity and show the maturation of the European market as a whole, with the inclusion of ...

2025: EU Adds Record 27.1 GWh Of

Battery Storage, Led by Utility ...

The EU installed 27.1 GWh of new battery storage capacity in 2025, a new record year powered by strong utility-scale deployment, according to SolarPower Europe.

EU battery storage additions hit 27.1 GWh in 2025, Germany leads

The EU installed a record-breaking 27.1 GWh of new battery energy storage system (BESS) capacity in 2025, with Germany and Italy topping the chart again, while Bulgaria emerged as ...

[European Energy Storage Inventory](#), JRC SES

This section outlines key EU projects, initiatives, and market trends in energy storage, highlighting efforts to integrate renewables, enhance grid stability, and support the clean energy transition.
