These Mid-Clamps are for mounting the semi-flexible frameless or thin-film solar panels. If the solar panels are flexible enough so the Solar Panels can roll up, these clamps will now work with the Panels. The mounting brackets are approximately 3. Photovoltaic bracket can be classified in the form of connection mode, installation structure and installation location. According to the connection form, it is divided into welding type and assembly type; according to the installation structure, it is divided into fixed type and day by day type;.
