

French power generation container

Overview

(EDF) is the main generation and distribution company in . It was founded on 8 April 1946 as a result of the of a number of electricity producers, transporters and distributors by the Communist Minister of Industrial Production . Until 19 November 2004 it was a government corporation, but it is now a limited-liability under private law (société anonyme). The shares of the company on the in.

French power generation container

Energy in France

Électricité de France (EDF) is the main electricity generation and distribution company in France. It was founded on 8 April 1946 as a result of the nationalisation of a number of electricity producers, transporters and distributors by the Communist Minister of Industrial Production Marcel Paul. Until 19 November 2004 it was a government corporation, but it is now a limited-liability corporation under private law (société anonyme). The French government partially floated shares of the company on the Paris Stock Exchange in ...
