

General mobile power supply energy storage cells

Overview

Mobile BESS products provide mobile, temporary electricity wherever and whenever it's needed. By storing low-cost off-peak grid power and dispatching it onsite as needed, mobile storage provides operators with emissions and noise-free electricity – often for days or weeks without. These Energy Storage Systems are a perfect fit for applications with a high energy demand and variable load profiles, as they successfully cover both low loads and peaks. Our new MBE series is a dedicated range of battery energy storage solutions that reduce fuel consumption and carbon emissions. Alex Smith, co-founder and CTO of US-based provider Moxion Power looks at some of the technology's many applications and scopes out its future market development. Discover how these portable solutions.
