

Giant lithium battery energy storage stocks

Overview

Against this backdrop, the Investing News Network has created an overview of the top-performing US lithium stocks on the NYSE and NASDAQ by year-to-date gains. Lithium powers the batteries that drive electric vehicles, smartphones, and renewable energy storage. As the clean energy transition accelerates, demand for lithium remains one of the biggest long-term investing stories. In this guide, we'll highlight ten of the best lithium stocks traded on major. One of the largest lithium battery producers on the planet, Panasonic is the go-to company for firms that need energy storage products for EVs, grid-scale storage and other next-gen battery applications. Panasonic trades "over the counter" and not on a major exchange, however, so investors should. According to industry forecasts, the EV battery market, driven by lithium-ion technology and emerging solid-state innovations, is poised to experience significant growth, from approximately \$92 billion in 2024 to over \$250 billion by 2035. Lithium prices dipped due to oversupply but rebounded in 2026 due to rising EV demand in China.
