

Global solar inverter market

Overview

The global solar inverter market size is estimated at USD 12.81 billion by 2034, accelerating at a CAGR of 7. This growth is as a result of higher demand for photovoltaic (PV) products in the international market that is expected to be high because of improved technologies in solar and policies that support their use. The paradigm shift toward the integration of renewable energy resources will fuel the adoption of efficient systems. The growing awareness regarding environmental issues and need to reduce carbon emissions is driving demand for clean. This report provides rankings of the top PV inverter manufacturers based on megawatts shipped, which are broken down globally, regionally, by product type, and by major market.
