

Grid-connected solar generator

Overview

These generators are designed to connect directly to the electrical grid, allowing homeowners to offset their energy usage with solar power and potentially even sell excess electricity back to the grid. These panels capture sunlight and convert it into DC power. That power isn't yet usable for most home appliances. It helps manage how and. I have a small grid-connected solar PV system. If it is connected to my main load center via a two-pole breaker, how can I safely add a generator inlet to this system ?

The usual method is to connect a generator is via a NEMA 14-30 jack, which is connected to the load center via a two-pole breaker.
