

Homemade solar power for home use

Overview

Building DIY solar panels for your house is a cost-effective way to reduce your electricity bills and your carbon footprint. Well, you might as well put that sweltering heat to good use. [1] What's even better is that you'll save money on you. Installing solar panels yourself can save you thousands of dollars while giving you more control over your renewable energy system. This guide explains whether you should make your own solar panel, what's involved, how much it costs, and when it's smarter to buy a factory-made module.
