

# How about sea land and air intermodal battery cabinets

## Overview

---

Yes, power banks are considered dangerous goods because they contain lithium-ion batteries. The uncertain risk involved in moving lithium-ion batteries by sea, land or indeed by air is well documented. This report details the critical updates within the International Maritime Organization. This article provides a detailed overview of the marine export process for lithium battery energy storage cabinets, covering aspects such as their components, booking, maritime filings, warehouse/trucking arrangements, customs clearance, and port entry considerations. There's a lot more to discover if you decide to dig a little deeper. It's a legal requirement. In light of the efforts to combat climate change and to reduce the dependence on fossil fuels, new sources of energy and energy storage systems are being developed.
