

How big is the wind gauge of a large wind turbine

Overview

No, they are just bigger. Output depends on wind speed and the combination of blade diameter and generator size. Bigger blades on a taller tower can capture more wind to run a bigger generator, but they do.

How big is the wind gauge of a large wind turbine

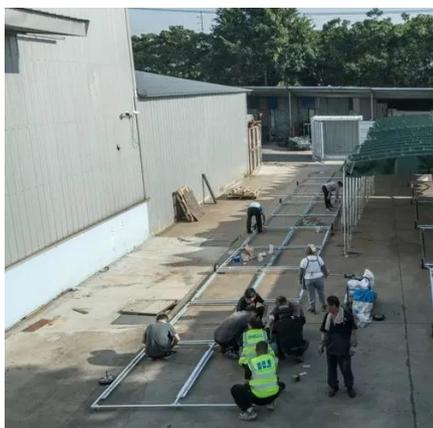

Wind turbine blades

For large sized turbines, the size of blades on a wind turbine is 280 feet, enabling the generation of several megawatts of power. The size of blades on a wind turbine is adapted to match the scale and ...
