

# How to remove snow when photovoltaic panels are too high

BMS Wiring Diagram

## Overview

---

To keep your solar panels snow-free, you've got several effective options. You can use a roof rake to gently pull snow off, or employ a leaf blower for light, powdery snow. Do I need to remove snow from my solar panels?

And if so, what's the easiest way to do it?

The short answer: In most cases, you don't need to do anything at all. And when snow does become a problem, the easiest way to automatically remove snow on solar panels isn't a rake or a gadget; it's smart. While the efficiency of solar panels drops in winter, proper snow removal techniques can help keep this loss to a minimum. That being said, handling panels carefully during maintenance is crucial to avoid voiding warranties or insurance coverage. While snow can temporarily reduce output, its impact is often smaller than expected. Warm water spray can melt snow safely, while adjusting panel tilt can encourage snow to slide off naturally.
