

# How to sell micro-electricity to the power grid

## Overview

---

If your asset is connected to the grid, then the simple answer is yes – you can sell any surplus power you generate back to the grid with the help of your existing import (domestic supply) supplier or by arranging an export power deal with a different supplier (various. If your asset is connected to the grid, then the simple answer is yes – you can sell any surplus power you generate back to the grid with the help of your existing import (domestic supply) supplier or by arranging an export power deal with a different supplier (various. Net metering isn't direct selling – You're not actually selling electricity for cash, but receiving credits that reduce future utility bills. Most homeowners see \$600-1,500 in annual bill reductions rather than income payments. Location dramatically impacts profitability – With 34 states plus D. Discover the best ways for small farms to sell renewable energy in 2025 — from PPAs to peer-to-peer models — with fewer gatekeepers and fairer prices. 2 A microgrid can operate in either grid-connected or in island mode, including entirely off-grid. Although many people with solar systems on their homes or businesses think that they can sell excess electricity to the power grid, the reality is that you can only sell power to the grid if you have an electricity generator's license and qualified power-generating assets. The grid, also known as the power grid, is the network of generators, cables and other transmission equipment that brings electricity from the place it's produced to.

## How to sell micro-electricity to the power grid

### [What is microgeneration: sell your excess energy](#)

Microgeneration systems are often integrated with the regular electricity grid, allowing for the exchange of surplus energy and financial compensation through feed-in tariff schemes.
