

# Is installing photovoltaic panels a reliable job

## Overview

---

Given their cost and impact, the solar company you hire to install your panels is a critical decision. It's been 100% worth it to me, but only because the following things are true: 1: I work for a company that doesn't suck 2: All my hours count toward my electrician's license This is not true for all companies and all places. People interested in converting their homes from traditional energy sources provided by local utilities and burning through fossil fuels are turning to. In 2023, the U. 4 gigawatts-direct current (GWdc) of capacity — a 51% increase from 2022, marking the industry's biggest year to date, according to the Solar Energy Industries Association (SEIA). An installer is someone who assembles and maintains solar panels. It can be tempting to go with.
