

Is installing photovoltaic panels a skill

Overview

You don't need a four-year degree to install solar panels, but you do need technical skills, safety training, and a strong attention to detail. Finish high school or earn a GED: Most employers and training programs require this baseline. Whether you are a solar installer or are seeking to become one, it can be helpful to familiarize yourself with the skill set you need to be successful in this. Solar installers build the systems that power homes and businesses, and you don't need a college degree to get started. These professionals play a crucial role in the renewable energy transition, helping homeowners and businesses. Photovoltaic Installers, often called solar panel installers, are skilled professionals responsible for assembling, installing, and maintaining solar power systems in residential, commercial, and industrial settings. We ranked the top skills for solar panel installers based on the percentage of resumes they appeared on.
