

# Is it good to have photovoltaic panels in the tomb hall

## Overview

---

Solar panels installed on a historic property in a location that cannot be seen from the ground will generally meet the Secretary of the Interior's Standards for Rehabilitation. Historic buildings are like fine wine—they can improve with age. But that doesn't mean they're. Many Congregations are keen to explore the possibility of using their place of worship to generate energy from a renewable source. A replacement roof and insulation have been installed at St Michael & All Angels, Witton Gilbert. These buildings often serve as landmarks and cultural. The good news is that the large size of church buildings and other houses of worship actually presents a shining opportunity: lots of space for solar panels! Wondering if installing a solar energy system is the right choice for your church and congregation?

Let's explore the various ways in which a.
