

Is it harmful to build solar power on the roof

Overview

When installed correctly, solar panels do not damage roofs. In fact, they can provide added protection from UV rays, hail, and extreme weather. Since the roof is one of the most critical parts of the home, it's natural to want reassurance. As more homeowners turn to solar energy for its environmental benefits and potential savings, it's important to consider the impact that solar panels can have on your roof. Solar panels offer a compelling mix of environmental benefits and financial incentives. While myths around solar panel radiation risk circulate online, there is no evidence proving that rooftop solar systems cause harm to people living underneath.

Is it harmful to build solar power on the roof

[Do Solar Panels Cause Roof Damage? The Truth In 2025](#)
