

Is it illegal to rent photovoltaic panels on farmers roofs

Overview

Yes, you absolutely can install solar panels on most barn roofs, and in many cases, barns make better candidates for solar installations than residential homes. The key is proper assessment and planning. This time around, however, the target happens to be farmers who choose to install solar panels on their land. Over the past few months, I've noticed an increasing number of headlines claiming that America's most productive farmland is being taken over by solar panels. The target for solar operations is increasingly in the Midwest, where government. Unfortunately, some states make this harder to achieve with restrictions on solar energy and its financing. While OPSB application approval does not guarantee a project will ultimately be built, Ohio's PV solar capacity would increase by 630 percent to a total of 1,535 MW if all nine projects currently under review with the OPSB are constructed.
