

Is it illegal to replace rooftop photovoltaic panels

Overview

Yes, most solar panel installations require permits. Whether you're installing rooftop panels or a ground-mounted system, local building departments typically require permits to ensure safety, code compliance, and proper grid connection. Some homeowners use this time to replace their solar panels as well. If you do not need a roof replacement for a few years, it may make sense to keep your existing system. State solar regulations generally fall into three key categories: installation requirements, financial incentives, and utility connection policies. While federal guidelines provide a baseline, local jurisdictions often implement additional requirements affecting everything from permit costs to HOA. Is Installing Solar Panels Illegal in Any State?

Technically, no state outlaws or bans solar panels; quite the opposite.
