

# Is it safe to build photovoltaic panels on flat ground

## Overview

---

Yes, solar panels can be installed flat. The biggest advantage of ground-mounted solar panels is that they offer greater control over the direction and angle of the solar panel. US-based energy technology developer, Erthos, is a clear example of a company investing heavily in flat PV panels. I get that wind can be a big concern, and I know there are other reasons why this might not be the best idea, such as affecting the panels' lifespan. Example: For Denver with a 1KW array: Flat on ground: 163 KWH/mo summer, 60 KWH/mo winter, and 1365 KWH per year Tilted 40 deg: 145 KWH/mo summer, 125 KWH/mo winter, and 1672 KWH per year So, you lose about 18% on a yearly basis in. On top of being an alternative to rooftop solar, ground-mounted solar systems can be used on farms, in your garden, and more! In this article, we'll explain what a ground-mounted solar system is and if you should consider it for your property.
