

Is it safe to install solar panels on the roof of a house

Overview

When installed correctly, solar panels do not damage roofs. In fact, they can provide added protection from UV rays, hail, and extreme weather. Since the roof is one of the most critical parts of the home, it's natural to want reassurance. It's important to consider the pros and cons of solar panels on your roof before you decide if a solar panel installation is right for you. Solar panels offer a compelling mix of environmental benefits and financial incentives. While myths around solar panel radiation risk circulate online, there is no evidence proving that rooftop solar systems cause harm to people living underneath. Does. Here's the good news: with professional installation and a properly maintained roof, the risk of damage is minimal.
