Is it safe to install solar power on the roof

ID2 SOLAR MARKET - Professional Energy Solutions

Overview

When installed correctly, solar panels do not damage roofs. In fact, they can provide added protection from UV rays, hail, and extreme weather. Since the roof is one of the most critical parts of the home, it's natural to want reassurance. It's important to consider the pros and cons of solar panels on your roof before you decide if a solar panel installation is right for you. Solar panels offer a compelling mix of environmental benefits and financial incentives. Does. Research from the University of California-San Diego in 2023 shows a roof with solar panels has its daylight temperature drop by an average of 5 degrees Fahrenheit because panels absorb the heat rather than the roof itself, and less heat is transferred through the roof into the home. While myths around solar panel radiation risk circulate online, there is no evidence proving that rooftop solar systems cause harm to people living underneath.
