

Israel Residential solar Systems

Overview

On December 11, 2025, a significant energy regulation officially took effect in Israel: all new residential buildings and certain types of towers are now required to install rooftop solar panels to obtain construction permits. According to the ministry's data, the average cost of installing a solar system in a multi-story building ranges. The use of solar energy began in Israel in the 1950s with the development by Levi Yissar of a solar water heater to address the energy shortages that plagued the new country. [1] By 1967 around 5% of water of households were solar heated and 50,000 solar heaters had been sold. [1] With the 1970s. Expanded tariff options, shortened payback periods, tax incentives, fast-track grid connections, and a massive PR campaign aim at 100,000 new solar roofs Solar panels on a single family home. Israel's Ministry of Energy and Infrastructure has declared a new plan for installing solar panels on 100,000 roofs in Israel. Posted on Dec 11, 2025 by Ifi Reporter - Dan Bielski Israel is set to implement one of its most significant renewable energy reforms to date, as a new Ministry of Energy regulation will require solar energy systems on the roofs of all newly built homes with roof areas exceeding 100 square meters.
