

# Israel purchases new solar panels and batteries

## Overview

---

Israel has signed a concession agreement to build a new solar power facility with integrated battery storage at the Ashalim energy complex in the Negev, a project expected to add significant capacity to the national electricity grid, the Finance Ministry said Sunday. Expanded tariff options, shortened payback periods, tax incentives, fast-track grid connections, and a massive PR campaign aim at 100,000 new solar roofs Solar panels on a single family home. This approval signals the. The project will use photovoltaic technology combined with large-scale energy storage, allowing electricity produced during daylight hours to be supplied to the grid at night or during periods of high demand. The majority of the newly-added capacity stems from projects operating under merchant power purchase agreements (PPAs). According to information published by Israel's Electricity Authority, the country installed 900 MW of. There's a growing movement in Israel focused on harnessing solar energy and advancing green technologies. The decision was part of the "Economic Plan for 2025 - Structural Changes" (also known as " The Arrangement Law "), which contains a.
