

Landscape turf planted under photovoltaic panels

Overview

Can grass grow under solar panels?

The answer is a resounding yes! In fact, solar panels can actually help grass grow better in some cases. Recent data from the 2024 SolarFarm Optimization Report shows 63% of solar installations experience reduced efficiency due to poor ground cover management. The real issue. What's the best way to landscape under ground mount Solar Panels (grass, stone, mulch, or something else)?

Weed barrier and something reflective. Lots of power company installs are doing rocks painted white. When I do, I am setting them over raised garden. Benefits can include protecting the soil, improved pollinator habitat and livestock (primarily sheep) grazing performance and reduced maintenance cost for the solar operator.
