

Lockheed martin clean energy battery

Overview

Global security and aerospace company Lockheed Martin has announced the development of a new “flow battery,” intended to save utilities money and boost the use of renewable energy. The battery will be made of inexpensive, nontoxic materials. GridStar® Flow, an innovative redox flow battery. military's first long-duration energy storage system. This is Lockheed's first customer-sited production system and is intended as a. Natural resources, energy, climate change, social issues and economic pressures are often closely interconnected. These global challenges are an integral part of our mission, driving innovations that protect employees, save lives, increase efficiencies, reduce costs and minimize environmental.
