

# Long-term discount for pv distributionized equipment used in schools

## Overview

---

The new Direct Pay option for nonprofits allows schools to receive a payment from the federal government for 30% or more of the solar installation cost. This significantly reduces the installation cost, making solar ownership more attractive for schools. In January 2025, Jefferson County Public Schools (JCPS) in Kentucky received \$1. These systems will improve indoor air quality, cool down classrooms, and cut energy costs - freeing up funds for teacher salaries and. Many if not most independent schools have the physical space for substantial installations of solar power: large, flat roofs; spacious parking lots and/or adjacent, unused land. Reduces school operating costs, creating resources for teachers and students. Supports thousands of clean energy. The Solar for Schools Grant Program ( "Program") is established pursuant to the act of July 17, 2024 (P. Beyond. While many schools rely on third-party funds to support solar projects, there are additional opportunities to scale renewable energy adoption through federal programs, state legislation, and local partnerships.
