

Malaysia renewable energy growth

Overview

Malaysia is expected to reach nearly 30 gigawatts of renewable energy capacity by 2035, reflecting a compound annual growth rate (CAGR) of 16. In 2021, the Ministry of Natural Resources, Environment and Climate Change (NRECC) set a target to reach 31% of RE share in the national installed capacity mix by 2025. According to GlobalData's "Malaysia Power Market Outlook to 2035, Update 2025 - Market Trends, Regulations, and Competitive Landscape,". Malaysia has traditionally depended on conventional power generation, including natural gas, coal, and hydropower.
