

Modular Battery Cabinet Constant Temperature and Humidity Operation Guide

Overview

This manual contains important instructions that should be followed during installation of Vertiv™ Liebert® APM2 Modular External Battery Cabinet (EBC) and accessories. On behalf of everyone at Eaton, we thank you for partnering with us, for trusting us to maintain your business continuity and for preventing downtime at your facility. Our suite of backup power, power distribution and power management products are designed to protect you from a host of threats. The C&C Power family would like to thank you for choosing a C&C Power Inc. product for your equipment needs. We know there are a lot of choices in the industry and we appreciate the opportunity to supply each of our customers with the highest quality power products manufactured in the United State. NOTE: The battery temperature must return to ± 3 °C / ± 5 °F of the room temperature before a new discharge at maximum continuous discharge power. If not, the battery breaker may be tripped due to overtemperature protection. All wiring must comply with all applicable national and/or electrical. The cabinets covered by the technical specification have been designed to contain the hermetic lead-acid electric accumulator batteries. The construction characteristics of the recombination type lead-acid electric accumulators (valve-regulated hermetic accumulators); the absence of acid fumes and. Ventilation systems must address health and safety as well as performance of the battery and other equipment in a room. Valve regulated lead acid (VRLA) batteries and modular battery cartridges (MBC) do not require special battery rooms and are suitable for use in an office environment. UPS-Dedicated Modular Cabinets: The “Emergency Shield” for Data Centers and Industry Servers in data centers and control systems in industrial production cannot tolerate even a one-second outage—it may cause millions in losses.
