

# New Zealand double-glass solar curtain wall application

## Overview

---

They are available in either transparent or translucent glass with integrated solar cells to convert clean electric solar energy into electricity. This means that power for a building could be produced within the roof, canopy, sky light or from the glazed vertical façade. Glass curtain wall provides an attractive building envelope, but it is generally regarded as unsustainable because of the high energy needed to maintain thermal comfort. The New Zealand Glass Curtain Wall Market is valued at USD 1. A very important and large part of any commercial building is the exterior curtain wall. We know it is important to our customers to ensure that the installation is. RAL, NCS, DB, anodised, metallic, highly weather resistant, sea water proof. Coating is carried out in conformity with the valid quality guidelines of the coating of building parts in aluminium of GSB-International GSB AL 631, or QUALICOAT regulations. CORNER JOINT Welded, no visible joint lines.
