

New wind power generation tree

Overview

Invented by Jérôme Michaud-Larivière, who founded the French company New Wind to bring it to market, these trees rely on a series of 72 vertical-axis micro-turbines (known as Aeroleafs) to generate power from gentler winds. It reduces the carbon footprint of organizations by producing cleanly produced green energy. It fits perfectly into urban and natural landscapes. High technologies at the service of the. The Wind Tree can exploit all types of wind, from gentle breezes to powerful gusts of wind in both urban and rural environments. Images © New World Wind

The reality of climate change is creeping in closer and closer each year, and it has led to an encouraging push to clean up the environment and. Renewable energy innovators are exploring inventive approaches to incorporate green energy into our homes - a unique solution to this challenge comes in the form of 'wind trees', a micro wind turbine designed to mimic trees.

New wind power generation tree

New Wind Tree: Tree Shaped Wind Turbines with Aeroleafs , HeroX

Invented by Jérôme Michaud-Larivière, who founded the French company New Wind to bring it to market, these trees rely on a series of 72 vertical-axis micro-turbines (known as Aeroleafs) to ...

The Wind Tree silently generates electricity from gentle breezes

A small gust of wind propels the leaves into motion and - voilà - the Wind Tree begins providing an environmentally friendly form of energy. The Wind Tree only requires an 11-meter radius ...

Aeroleaf

New World Wind invites you to discover the Aeroleaf® ; a unique technology in the world created by our company after many years of research and development. Our team has developed strong ...

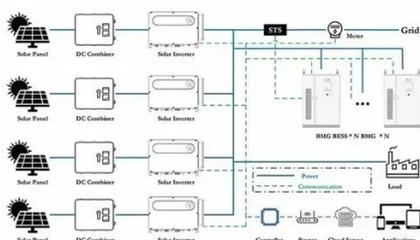

aeroleaf hybrid's tree-shaped wind turbine includes solar panels for

On October 11th, New World Wind welcomed its first Aeroleaf Hybrid in Birmingham, UK. Its tree-shaped wind turbine stands tall on a hill, and its leaves keep rotating to capture the air and

Tree with Solar Panels and Wind Turbines gives Nature-Inspired Clean

In the quest for sustainable energy solutions, New ...

New World Wind's "wind trees" generate dual green energy discreetly

French energy startup New World Wind has developed the "WindTree", a tree-shaped turbine equipped with micro-wind turbines called Aeroleaf Hybrid. These leaves keep rotating to ...

[Wind Trees - A New Solution to Green Energy Production](#)

Renewable energy innovators are exploring inventive approaches to incorporate green energy into our homes - a unique solution to this challenge comes in the form of 'wind trees', a micro wind turbine ...

WindTree

Complete solution for the production of electricity, the Wind Tree is ideal for companies and communities. It reduces the carbon footprint of organizations by producing cleanly produced green ...

[These tree-like turbines make home wind power possible](#)

From community solar farms to co-owned wind turbines, eco-inventors are coming up with new ways to bring renewable power into our homes. Now, micro wind turbines designed to look ...

Tree with Solar Panels and Wind Turbines gives Nature-Inspired ...

In the quest for sustainable energy solutions, New World Wind has unveiled its revolutionary Aeroleaf Hybrid technology--a micro-wind turbine shaped like a tree, combining the ...

Wind Trees silently generate electricity from gentle breezes

Imagine a tree, with its trunks and branches made of steel, where each leaf is a mini wind turbine. These artificial trees don't just blend with the urban scenery; they actively contribute to it. A ...

The Wind Tree silently generates

electricity from gentle breezes

Aeroleaf Technology Other Models Tree For Tree Deal How Much Does It Cost? For every Wind Tree, Bush, or Modular Tree purchased, New World Wind's partner MyTree has pledged to plant ten new trees - actual trees. The company has already planted dozens of trees around the world.
