

# Philippines Communications Green Base Station Ranked First

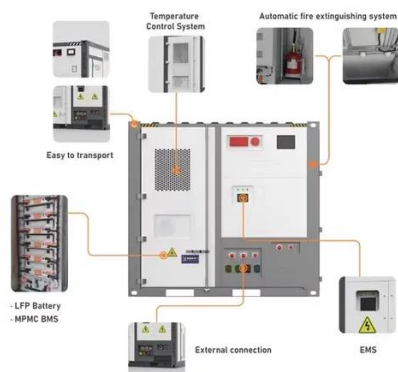

## Overview

---

Get profiles of Philippines Telecom MNO companies - leading, established, and top emerging players - with analyst insights, competitive matrices, and strategic positioning details of these firms. Philippines Base Station Antenna Market, valued at USD 1.2 billion, grows with 5G adoption, network densification, and government policies like Common Tower Policy for better coverage. 2 billion, based on a five-year historical. In a world where connectivity is key, the telecommunications industry emerged among the most essential industries, as it enabled personal and professional communication and a key tool used by businesses. Analyst insight highlights aggressive investment and innovation as key rivals strive for better. Major investment programs covering LTE, 5G, and fibre broadband networks suffered slight delays due to holdups in supply chains, but activity has since ramped up in an attempt to complete the rollouts as per the original schedule. Currently there are four mobile operators in the country. In a release, the telco said this continuous deployment has resulted in a 5G outdoor coverage of 97%. As of end-June 2022, Smart has rolled out around 77,100 total base stations nationwide, supporting its 3G, 4G/LTE.
