Let's face it: the sun isn't just for beach days anymore. With global photovoltaic (PV) energy storage wholesale markets projected to hit \$38.96 billion by 2030—growing at a jaw-dropping 27%. The analysis and cost model results in this presentation (“Data”) are provided by the National Renewable Energy Laboratory (“NREL”), which is operated by the Alliance for Sustainable Energy LLC (“Alliance”) for the U.S. Department of Energy (the “DOE”). This impressive growth is primarily driven by the increasing adoption of renewable energy sources and the concept of wholesale markets in energy storage is gaining significant attention as the world transitions towards a more sustainable and renewable energy-based economy. This work has grown to include cost models for solar-plus-storage systems. NREL's PV cost benchmarking work uses a bottom-up.
