

Photovoltaic panel green screen material

Overview

Photovoltaic Integration: What truly sets modern solar screens apart is the option to integrate photovoltaic (PV) cells into the screen material. This creates a photovoltaic screen, meaning the window screen not only shades your home but also generates. When searching for solar screen fabric, you have several excellent options here at Quality Window Screen Co. You might know exactly how much fabric you need, or, maybe your screening business. Phifer Suntex Solar Screen Fabric with 90% sun blockage is great for interior or exterior installations. The 90% blockage factor provides superior comfort and heat blockage while still maintaining visibility and daytime privacy. Designed to reduce heat transfer through windows, this high quality fabric also reduces the glare and harmful UV rays from the sun. Read more about transparent solar panels.
