

# Photovoltaic panel purlin positioning device

## Overview

---

This is an ATec certified photovoltaic fixing system designed for pitched roofs with trapezoidal steel decks. Versatile, it also adapts to sandwich panels and enables reliable integration of solar modules in landscape orientation. These structural members form the backbone of solar panel mounting systems, ensuring stability, strength, and long-term alignment of modules. Optimizing purlins can improve energy output by up to 32%, reduce installation time, and lower structural costs. The first purlin further including a first linear shaped top surface configured for mounting a first solar module.
